CYBERSECURITY ANALYSIS

Did you know the average cost of a data breach in 2020 will exceed $150 million?[1]

Introducing Cybersecurity Analysis

IIBA® and IEEE Computer Society have partnered to offer a robust learning and certification program on what business analysis professionals need to know to be prepared for today's cybersecurity challenges.

Advance Your Career with Cybersecurity Training

The joint IIBA and IEEE training and certification provides the credibility of a joint certification and the opportunity to learn key cybersecurity concepts and tools business analysis professionals need to demonstrate core competencies.

The eLearning modules provide the basics of cybersecurity designed around the kind of analysis needed to assist in the overall cybersecurity solution, and leverages the collaboration of the business, the analyst, the architects and the technology experts to create a safe and secure cyber environment.

Business Analysis Professionals and Cybersecurity

The role of business analysis in cybersecurity is rapidly on the rise. The 2019 Global Business Analysis Salary Survey states 21%[2] of business analysis professionals report being involved in their organizations' cybersecurity practice, as a critical liaison between technology and the business.
